Screenshots [iPad](#) [iPhone](#)

Turn your smartphone into a pocket guide to the Cleveland Museum of Art with the ArtLens App. Use it as a companion within the museum, or as a way to explore from home. Download before arriving, plan your visit, and create or browse tours. While visiting, use the interactive map as a guide to navigate the museum, and keep track of your favorite artworks and gain in-depth information about every object on

view. The ArtLens App uses Bluetooth technology to connect to the museum's iconic ArtLens Wall and ArtLens Exhibition interactives, and updates in real-time ensuring that users have access to the most accurate information available.

The ArtLens App features five main categories:

1. Search

Search the CMA's collection by artist name, artwork title, and accession number to discover works on view in the museum. Here you can find a scrollable list of "Recent Acquisitions," "Collection Highlights," and "Top Ten Visitor Favorites."

2. Galleries

- Scan: Using innovative image-recognition software, ArtLens App seamlessly recognizes a selection of two-dimensional artworks and provides additional curatorial and interpretive content. Look for the scan icon next to an artwork to find objects with scannable content.

- Map: Galleries are color-coded and grouped thematically to facilitate easier navigation. Tap any gallery number to see a gallery description and all artworks in that gallery.

- Wayfinding: Push the "Find Me" button at any time to find your exact location in the museum.

- Content: Includes every artwork on view, including more than 1,500 videos, available for selected artworks. Changes to any object on view are dynamically and immediately updated from the backend systems across the app and throughout the museum.

- Nearby Artworks: Visitor-favorited and featured artworks.

- Bluetooth: ArtLens App uses Bluetooth to connect to ArtLens Wall and all interactives in ArtLens Exhibition, making synchronization seamless.

3. Tours

Select from "Featured," "Multimedia," "Themed," and Visitor-Created" tours in ArtLens App. The mapping feature locates specific artworks and navigates the entire tour. Build your own tour from home, and share your creation with anyone.

4. You

Favorited artworks on the Wall and the App and artworks played in ArtLens Exhibition interactives are automatically saved in "You." Favorites can be used to create personalized tours, find specific artworks or share on social media.

5. Museum

Get a daily snapshot of events and special exhibitions occurring at the museum as well as the location of restrooms, restaurants and exits. Museum hours of operation are also listed on this page.

Cleveland Museum of Art - app

I spent two days submersed in the fabulous collection at the Cleveland Museum of Art. We came in from out of town to study works in the American wing and contemporary collection. Rather than photographing the paintings and side notes I opted to use the museums app ART LENS. Spent alot of time looking and marking up the paintings in their LIKE  folder. Goal was to look back at the app and do further research at home.

Guess what...the darn app only works inside the museum! It only loads to 60% at home. So now I am back from vacation with no research notes or photos.

The Cleveland Museum of Art experience was out standing. But my goal was to come back to the art studio to do research. I am left so disappointed that the app failed.

Good intentions app but needs a lot of fine...

While informative, it's only at times. A lot of the "scan" items need updating as they don't register in the app. Some that say there is audio to listen to, but there is no audio. Felt it was choppy and got frustrating to use when trying to learn. Also annoying a lot of you save while there isn't saved properly when home.
